TYPOGRAPHY REFERENCES

Exploring typography that gives TRAIL an editorial, curious and quietly modern character.

REF 01 — EDITORIAL SERIF

Strong serif typography creates an editorial and sophisticated feel.

REF 02 — TYPE CONTRAST

Serif, sans-serif and script create different levels of visual emphasis.

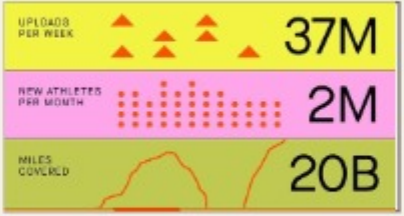

REF 03 — OVERSIZED TYPE

Large typography creates a bold visual focus and strong first impression.

REF 04 — TRAVEL EDITORIAL

Typography and imagery work together to create a sense of journey and discovery.

REF 05 — NUMBERS & DATA

Clear number styling makes distance, time and other trail information easy to scan.

REF 06 — QUIET MODERN

Minimal typography and open space create a calm, refined visual character.

BRAND VOICE

Words that wander with purpose.

TRAIL doesn't give directions — it offers invitations. We write like a curious local pulling you toward the next doorway, the next detour, the small thing worth noticing on the way to somewhere else.

01 — FIVE VOICE PRINCIPLES

01

QUESTION-FIRST

We open with wonder, not instructions. Every line assumes the reader wants to be pulled somewhere new.

"What if the long way is the good way?"

02

OFF-ROUTE

We phrase things sideways. Where others say *fastest or best*, we say *stranger, quieter, further in*.

"Skip the main road. There's a bakery three turns from here."

03

FIRST-PERSON LOCAL

We write like someone who lives here. Specific streets, real hours, honest opinions. Never generic, never algorithmic.

"My favourite bench in the city is on this trail."

04

IN MOTION

Verbs lead. We favour walking, wandering, turning, following. Copy should feel like it's already moving forward.

"Keep walking. The trail bends left after the mural."

05

EDITED, NOT DECORATED

Modern, spare, editorial. No exclamation marks, emoji, no hype. One good sentence beats three eager ones.

"Six stops. About an hour. Worth every one."

02 — GENERIC → TRAIL

NON-OTHER APPS TALK	HOW TRAIL TALKS
Search nearby	*What's around the corner?*
Fastest route	*The route that's actually interesting*
Recommended for you	*Six people we trust made this trail*
You have arrived	*You made it. Now stay a while.*
Top rated places	*Places locals return to*
Explore more	*Follow the trail a little further*
No results found	*Nothing yet. Try walking in a different direction.*

03 — DO

Ask, don't announce
Open with curiosity, not commands.

Name the specific thing
"The bench, the mural, the bakery on 5th."

Suggest, never insist
Invitations, not instructions.

Move the reader forward
Every line should feel like what's next.

Sound like a person
If a friend wouldn't say it, we don't either.

04 — DON'T

Say "best" or "top"
Rankings flatten the world. We don't rank.

Promise efficiency
Fastest, easiest, quickest — not our language.

Shout with punctuation
No exclamations, no emoji, no all-caps hype.

Explain the obvious
Trust the reader to be curious enough to look.

Sound like a database
No "results", "items", or "points of interest".

Don't write directions. Write invitations.

EDITORIAL / LAYOUT REFERENCES

Exploring layouts that support TRAIL's journey-based and discovery-focused experience.

EDITORIAL GRID
Structured grids keep information clear and easy to scan

TRAVEL EDITORIAL
Photography and text work together to tell a place-based story.

ASYMMETRICAL FLOW
Uneven image and text placement creates a more dynamic visual flow.

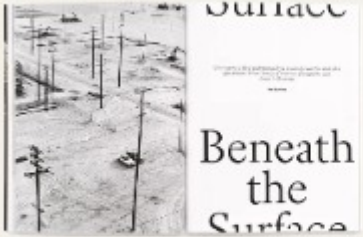

IMAGE + TEXT
Large imagery creates the first visual focus while supporting text guides the reader

ROUTE INFORMATION
Maps, numbers and location markers can turn information into a visual journey

MINIMAL EDITORIAL
Generous whitespace creates a calm and modern reading experience

INFORMATION HIERARCHY

How information is read, from discovery to action.

01 / FIRST — DISCOVER

TRAIL NAME

The main destination or trail name gets the strongest visual emphasis.

02 / ORIENT — KNOW

TIME · DISTANCE · STOPS

Quick information helps users understand the journey at a glance.

03 / EXPLORE — UNDERSTAND

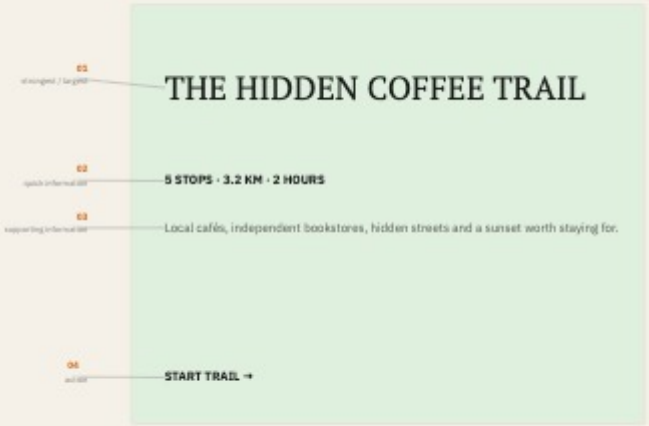

DESCRIPTION

A short description explains what makes the trail worth discovering.

04 / ACT — START

START TRAIL →

The final action is clear but visually secondary to discovery.

HIERARCHY PRINCIPLE

SEE → UNDERSTAND → EXPLORE → ACT

TRAIL

DON'T JUST GET THERE.
DISCOVER ALONG THE WAY.

TRAIL is a curated exploration and discovery platform that helps people find places, experiences and stories through connected journeys — not just destinations.

CURIOSITY · DISCOVERY · MOVEMENT · JOURNEY · LOCAL · UNEXPECTED

DISCOVER → FOLLOW → EXPLORE

Every person leaves a trail. Every trail can lead to something worth discovering.

PROBLEM

DISCOVERY HAS BECOME PREDICTABLE.

When people want to explore, they usually search for the "best" cafes, restaurants or attractions nearby. The result is often a long list of highly rated and popular destinations.

People repeatedly visit places that are already known, highly recommended or heavily promoted, making exploration feel predictable.

THE TRAIL IDEA

TRAIL CREATES JOURNEYS, NOT JUST LISTS.

TRAIL is a curated exploration and discovery platform where individual places are connected into themed journeys.

THE QUESTION SHOULD NOT ONLY BE:

WHERE SHOULD I GO?

IT CAN ALSO BE:

WHAT CAN I DISCOVER

ALONG THE WAY?

Traditional Discovery

SEARCH

LONG LIST OF OPTIONS

CHOOSE THE MOST POPULAR

GO TO ONE DESTINATION

END

THE HIDDEN COFFEE TRAIL

The user does not simply visit one place. They experience a sequence of discoveries.

TRADITIONAL PLATFORMS	TRAIL
Find a destination	Follow a journey
Search-based	Discovery based
Fastest route	Interesting route
Individual places	Connected experiences
Efficiency	Curiosity
You know where you are going	You discover along the way

DON'T FOLLOW THE MAP. FOLLOW THE CURIOSITY.
EVERY PLACE IS A DOORWAY TO THE NEXT.

TRAIL should feel like a curious local friend who knows interesting places and encourages you to take the unexpected route.
