TRAIL

Deliverable 11 — Dataset & Sources

TRAIL Panaji Curated POI Dataset

TRAIL | Member 4 — AI, Data & Finance

Project	Cartographic Pedestrian Exploration & Discovery Platform
Prepared for	BridgeAura Startup Challenge — final submission
Document basis	TRAIL repository handoff and Member 4 deliverable files

1. Dataset Overview

The project's documented dataset is a curated collection of 21 points of interest (POIs) around Panaji, Goa. It is used by TRAIL Scout to generate place recommendations and walking-trail dossiers. The repository identifies the primary data file as backend/src/data/spots.ts and a frontend mirror at frontend/data/spots.ts.

Property	Documented value
Dataset name	TRAIL Panaji Curated POI Dataset
Version/date	Version 1.0; October 2026 (as stated in project files)
Record count	21 POIs
Format	TypeScript array of typed Spot records
Coverage	Panaji and nearby quarters/areas named in the dataset
Personal data	Project documentation states zero PII
Primary / mirror	backend/src/data/spots.ts / frontend/data/spots.ts

2. Dataset Inventory

#	Place / record name	Category	Area in source
1	Cafe Bodega / Sunlit Atrium	Coffee	Fontainhas
2	Caffe Tato	Coffee	City Centre
3	Organic World Cafe	Coffee	Altinho
4	Singbal's Book House	Bookstore	City Centre
5	Literati Bookshop & Café	Bookstore	Calangute
6	Gallery Gitanjali	Art	Fontainhas
7	Sunaparanta Goa Centre for the Arts	Art	Campal
8	Fontainhas Street Art Corridor	Street art	Fontainhas
9	Campal Gardens & Promenade	Nature	Campal
10	Miramar Promenade	Nature	Miramar

#	Place / record name	Category	Area in source
11	Altinho Hilltop Viewpoint	Viewpoint	Altinho
12	Church of Our Lady of the Immaculate Conception	Heritage	City Centre
13	Panjim Inn Heritage Property	Heritage	Fontainhas
14	The Secret Courtyard (Unnamed Lane)	Hidden gem	Fontainhas
15	Altinho Resident Clearing	Hidden gem	Altinho
16	Taras Ceramic Studio	Artisan	Fontainhas
17	Ritz Classic Restaurant	Food	City Centre
18	Horseshoe Restaurant	Food	Fontainhas
19	Underground Vinyl Den	Music	Fontainhas
20	31 January Road Municipal Market	Culture	City Centre
21	São Tomé Heritage Lane	Heritage	Fontainhas

3. Data Fields / Schema

The documented Spot schema includes: id; name and optional shortName; category and categoryTags; description; curatorNote; location latitude/longitude/address/quarter/city; vibes; footTraffic; bestTime; optional openingHours; estimatedMinutes; walkTimeFromCenterMin; distanceFromCenterKm; indoorOutdoor; noiseLevel; optional wifiAvailable, petFriendly and highlighted flags; and source/provenance.

4. Data Preparation and Quality Controls

The repository describes category normalisation into a 12-category set, coordinate standardisation to four decimal places, duplicate/closed-venue removal, consistent opening-hours formatting, and a privacy review. Missing hours should be presented as unknown/verify-on-arrival rather than invented. Each record should retain a source/provenance field so the team can audit where a claim came from.

Quality caveat: the project files describe field verification and cross-checking, but this document does not independently verify every venue, opening time, coordinate, or factual description. Before public launch, check every record in person or against authoritative current sources and retain a dated verification log.

5. Source Register

Source	Type	Purpose / use	Reference
OpenStreetMap / Overpass API	Public map data/API	Coordinates, place tags and geographic context	https://overpass-api.de/
Goa Tourism Department	Government tourism material	Tourism and regional context	https://goatourism.gov.in/
TRAIL field curation	Project research	Curator notes, vibe tags, venue checks and foot-traffic observations	Team fieldwork log; date each check
Community submissions	User-contributed	Local tips and hidden-place suggestions	Anonymous form; document consent and moderation
Google Maps Platform / Places	Third-party verification tool	Cross-checking place details, where permitted	https://developers.google.com/maps
Wikidata	Open knowledge graph	Heritage and architectural context	https://www.wikidata.org/
INTACH Goa / heritage-walk material	NGO / heritage reference	Heritage-site identification and context	Use the exact report/page consulted in final references

6. Research Sources Cited in the Project’s Financial/Market Work

Source named in repository	Intended use
Goa Tourism Department — 2024 statistics	Tourism context and market sizing assumptions
AllTrails investor/annual materials	Comparable subscription/conversion benchmark
Strava industry/subscriber data	Comparable conversion benchmark
Google AI Studio pricing	Model/API cost assumptions
Razorpay pricing	Payment processing fee assumption
Fortune Business Insights — smart tourism market	Broader category context
UN Tourism / World Tourism Barometer	Travel/experience-market context
VoiceMap and GPSmyCity pricing pages	Competitor pricing benchmarks
Local Panaji walking-tour research	Local price comparison; distinguish field quotes from assumptions

7. Privacy and Licence Notes

Use public, appropriately licensed, anonymised or synthetic data. The project files identify OpenStreetMap as ODbL-licensed; comply with attribution and share-alike obligations where applicable. Confirm terms for each API and source before redistribution. Do not include personal phone numbers, private addresses, identity documents, payment data or private user records. An anonymous form should not collect email addresses or other identifying fields unless there is a documented need and consent.

8. Files to Include in the Sources Folder

For the final hand-in, include: (a) this source register; (b) the actual dataset file or a clean export of the 21 POI records; (c) a README describing fields and update date; (d) the source/verification log; (e) dataset licence/attribution notes; and (f) screenshots or sample API output showing the dataset is used by TRAIL Scout. The merged repository supplied for this document identifies the code files but does not itself provide separate external source documents or proof of each field check.

Source basis: the TRAIL repository files member4/D11_DATASET_AND_SOURCES.md and member4/D10_AI_DATA_STRATEGY.md. External sources are listed as supplied by the project; their individual claims and current availability should be verified before submission.
